

Dear Whomever,I STRONGLY support XM and what it does. It's instant traffic and weather makes it easier for me to turn on a channel and listen for issues or problems instead of local FM or AM channels which hardly tell you what issues are on the roadway or weather in the area at that time. I never listen to the same channel on XM constantly, it all depends on my mood thanks in part to the wide variety of channels its service offers, unlike local stations XM HAS variety in which I like!! I pay for XM and it is up to noone to tell me what I can listen to and pay for!!! I strongly urge you to reject NAB's petition 04-160 and let XM be free to those who want variety and programming we deserve!!!!

Thank YOU
